Engineered Business Solutions

Welcome to Carnegie Strategic Design Engineers, LLC

Carnegie Strategic Design (CSD) is a premier provider of multidiscipline engineering and management services for the heavy industrial and government sectors.

We specialize in projects related to reducing costs, improving production, maintaining infrastructures, and assuring environmental stewardship, keeping life safety in the forefront of our activities.

Our mission is to be the premier global provider of engineered business solutions by communicating and understanding our customers' needs and goals. We will utilize our many years of business knowledge and problem-solving expertise to assist our customers and employees in reaching their goals.

We offer the following Engineering Disciplines:

Chemical Process

Environmental

Civil / Structural

Mechanical

Piping

Electrical

Instrumentation and Controls

Programming

Structural Inspection

Mechanical Integrity Inspection

We provide cost effective business solutions.

We earn the respect of our customers by continually exceeding their expectations and achieving the global standard for quality through innovative, engineered business solutions.

This is achieved by mutual respect.

Respect is at the heart of building business relationships. It is the glue that holds together the functioning of teams and partnerships.

We focus on the following business sectors:

Oil and Gas

Natural Gas Liquids

Midstream

Downstream

Chemical

Petrochemical

Power Generation

Metals
